

PROBLEMS	Date for Fixing	Comments
<b>BACKEND</b>		
Reports have some problems like the total in the revenue report is not correct etc.	✗	It still has problem in the commission percentage calculation.
Hide and Show button to be added on the vendor panel.	✓	
Alarm notification (Bell Sound) for the vendor when a new order is received.	✓	
Arabic in the order details when customer is placing order using Arabic interface.	✗	In admin panel we still have this problem.
Addons have problem can't see the addons when I am adding from 'Add Product' or when I edit the product can't see addons there or from the button 'Add On' or from the button 'Add addon' it show there when you add from the button but can't see the addons in the application.	✓	
If any one of the drivers rejects the order the status of the order is changed to cancelled.	✓	
Live location of the driver is not working. Both on application and on the vendor and admin.		
We have a problem in uploading same product for different branches of a same restaurant or if adding same name product in different restaurants.	✓	
Whenever you update something like product or change the status the vendor/admin panel it redirects to the 1st page and then we have to navigate to the page again where we did some change. (refresh)	✗	Now it is going to product details page. It should navigate to the previous page.
Sub Admin have problem that if you add a sub admin and login it shows the same profile of the admin and have other access problems as well.	✓	
Can see shops more then 20km in all the categories.	✗	
If you make any change in the shop details it has a lot of problems.	✗	This problem has been discussed several times in the group and in Zoom meetings.
<b>APPLICATION</b>		
To Remove OTP from both IOS and Android Delivery Boy App.	✓	
The text in the customer application for the name of the SHOP is in white color and is not visible as it is on the picture, it should be separate from the picture so it will be visible.		
Push notification on IOS for both the Apps (Easy Delivery & Delivery Boy)	✗	
Refresh problem in Delivery Boy Applications for the new order.	✗	You have given then scroll down refresh.
On IOS After accepting the order the App shows the location of the vendor but can't use the navigation feature of the maps, just a location mark is showing. Both for vendor and customer.	✓	

Main page of the app on Android they are static written in the GUI it has to be dynamic so that we can change it if we need as we have interface in admin panel to edit and change the services. Needs to be connect over there.	✓	But it shows the old interface for two seconds and then load from the backend.
On Android when we go inside the shop the products are no showing in Arabic.	✓	
On IOS when the product is in the cart and you decrease the quantity of the product it is going below zero and taking negative value.	✓
